Making a Difference

Want to make a difference? Get involved by not only helping to pick up the litter, but in monitoring and reporting of illegal dumping.

The BLM has combated illegal dumping on the public lands for years. Not only is household trash being dumped, but other items including abandoned cars and boats, refrigerators, tires, hazardous materials and trigger trash. This eyesore is being left for the public to view as they try to enjoy the open spaces of public land.

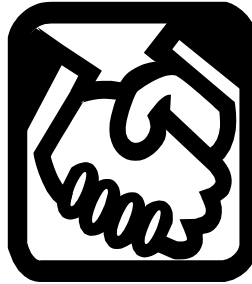

To deter illegal dumping, the BLM is dedicated to working with the public to build a strong foundation for a successful “Adopt-a-Space” Program. Our goal is to be visible by campaigning, teaching and acting on illegal dumping, and joining in partnership with those groups who have a passion for keeping the public land free of litter.

REMEMBER

Getting Involved

Who:

We are looking for individuals, groups, schools, businesses, organizations and anyone who is interested in participating in the “Adopt-a-Space” Program.

What:

BLM staff will work closely with the volunteer group leader, guiding them through the step-by step process of adopting a space.

When:

This program runs year round. However, dependent on the weather conditions, for safety we will work with you to determine the best season of year, day of week and time of day to execute the clean-up.

Where:

Pre-determined spots have been designated for the “Adopt-a-Space” Program. However, if there is an area in need of clean-up that you are passionate about, we will work with you in getting it nominated and adopted.

It is the mission of the Bureau of Land Management (BLM) to sustain the health, diversity, and productivity of the public lands for the use and enjoyment of present and future generations.

The “Adopt-a-Space” Program helps facilitate this mission by creating public land stewards who will assist the BLM with keeping public lands free of litter so that all may enjoy.

An important key to our success is your participation. Your involvement in this program provides you the opportunity to improve public land habitats, create partnerships and strategies, work on team building skills through a wide array of programs and display how much you care about the public lands.
